

MarkReader

OMR Software

The screenshot displays the MarkReader software interface for designing an OMR form titled "Pilot MarkReader-hotel_review.frm". The interface includes a menu bar with "FORM DESIGN", "SCAN & READ", "SCORE & REPORT", and "HELP". Below the menu is a toolbar with icons for "New", "Open", "Save", "Save As", "Print", "Data Source", "Delete", "Settings", "Fields", and "Export", along with a progress slider from 0 to 100. On the left, a vertical "Elements" panel contains icons for "Grid", "List", "Question", "Barcode", "Text", "Image", and "Clip". The main workspace shows a form design for a hotel review. It includes a "Date" field with a grid of circles, a "How did you hear about us?" section with radio buttons for "Agency", "Internet Search", "TV Commercial", "Magazine Commercial", and "From a friend", a "What is your overall satisfaction?" section with radio buttons for "1" through "5", a "Stay" section with radio buttons for "Business", "Family", "Couple", and "Group", and a "Your age" section with radio buttons for "<20", "20-30", "30-40", "40-50", and ">50". At the bottom, there is a table for rating hotel services.

OTEL	Good	Neutral	Bad
1.Desk staff	☐	☐	☐
2.Room cleanliness	☐	☐	☐
3.Bathroom cleanliness	☐	☐	☐
4.Proper functioning of TV, lights, air-conditioner etc	☐	☐	☐
5.Bed & furniture	☐	☐	☐
6.Restaurant services & staff	☐	☐	☐
7.Bar services & staff	☐	☐	☐
8.Food & drink	☐	☐	☐
9.Pool	☐	☐	☐
10.Other otel services	☐	☐	☐

Design, print, scan and read OMR forms with *MarkReader*. No need for expensive scanners and special forms.

Your ADF scanner and office printer is a complete testing center with *MarkReader*.

JWord v4

JWord is an advanced rich text editor for the Java platform (J2SE). With its rich set of features, JWord will power both your Java Swing based desktop and web based applications. Paging, multi-section documents including header and footers, tables, images, numbering, bulleted lists are among the features of this RTF and XHTML based editor. JWord works on XHTML, ODT (Open Document), and native XML files other than RTF, exports to PDF and XSL-FO, supports many bitmap (GIF, PNG, JPG, BMP) and vector (WMF, EMF, SVG) image formats and participates in clipboard actions. The lightweight control is also suitable for web based applications that require editing of XML, HTML or RTF based documents from within the browser.

JWord has a web based interface (JWordWeb) too. You can compose real documents with a tiny JS library using JWordWeb.
